compressor to reduce the size of a PDF to less than 2MB. So, let's start:-

[Send Feedback](#)

## How to compress PDF to 2MB?

Under 5 seconds you can reduce the size of the pdf file. Follow the 4 simple steps given below that can help to compress a PDF file.

1. Upload a PDF file for compression from your device.
2. Mention 2MB PDF size in the input box above.
3. Press the "Compress PDF" button and wait for compression.
4. Done! download your file.

It's that simple to compress a PDF file to 2MB in just 5 seconds. Also, if you want to compress PDF files in other sizes, you can check the links below:-

- [Compress PDF to 200kb](#)

## Process Multiple PDF Files Simultaneously

Obviously, you can compress multiple pdf files up to 2MB with PI7 PDF Compressor. Here in this online tool you can process unlimited PDF files but make sure there is a limit to processing 3 PDF files at a time.

The good thing is that you don't have to set the quality of each file. Our tool automatically sets it to your size requirements. This feature of our PDF compressor can save you a lot of time and energy.

Thank you. We hope you find this guide useful.

You can use this tool with instructions in the [Indonesian language](#) as well.

## Compress PDF to another specific size

We offer a variety of options for compressing your PDF to any size. Simply choose one from the list
